

ARCO SYSTEM

FEES FOR PARTICIPANTS

Please note that only the Spanish version of this Circular produces legal effect. Any translation is provided for commercial purposes only.

Regulation 1. General.

1. The fees set out herein do not include VAT.
2. All fees are invoiced on a monthly basis, unless expressly stipulated otherwise.
3. The fees stated in basis points are expressed on an annual basis of 365 days.

Regulation 2. Participation and account maintenance fees.

1. Participants will be charged a fee of €750 per month for the acquisition and maintenance of participant status. This fee will be applied to each of the participant's BIC codes.
2. A fee of €100 per month will be charged for the maintenance of each account associated with each participant code. The cost of the first proprietary and third-party account for each entity, and the first account of each CSD participant in IBERCLEAR, is included in the participation fee.

Regulation 3. Domestic securities safekeeping.

1. Securities are considered to be domestic when IBERCLEAR acts as the issuing Central Securities Depository (hereinafter, the CSD).
2. The safekeeping fee for the equities securities is set as a percentage of the cash value of the securities registered in the participant's accounts.
3. These balances are valued using the closing price of the securities at the end of each day. If it is not possible to determine this closing price, the closing price for the previous available trading day is used or, ultimately, the nominal value of the security.
4. When tranches are determined for the safekeeping fees, these are applied cumulatively: i.e. the balance in the first tranche is subject to the fee for that tranche; the balance in the second tranche is subject to the fee for that tranche; and so on.
5. The safekeeping fee is calculated by summing the balances for all the accounts with the participant's BIC code and applying these to the fee tranches. This involves calculating the average monthly balance for all the participant's accounts, using the balance at the close of each

day multiplied by the number of calendar days on which the balance did not change, divided by the total number of days in the current month. This calculation is performed by asset type as defined in the fees, and by applying the tranches to this average monthly balance, the system will calculate the average monthly fee in basis points. This average fee is then applied to the balances of each of the participant's accounts in order to establish the due amount per account. The total for the entity is calculated as the sum of applying the average fee to the average balances for each account.

6. The exchange rate for the last business day of the month, as published on the European Central Bank website, is used for invoicing issues denominated in currencies other than the euro.

7. The fees applicable to domestic equities are:

a) As a general provision, the following scale is applied cumulatively:

Tranches		Fee (basis points)
From (€)	To (€)	
-	1,000,000,000.00	0.150

b) An annual fee of 0.05 basis points is charged on investments in exchange-traded funds, warrants, shares of stock exchange open-ended collective investment schemes (SICAV), together with SICAVs, [shares in investment funds admitted to trading on the Alternative Equity Market \(MAB\)](#) and shares and units issued by collective investment Schemes (CIS), hedge funds and funds of funds (FOF) listed on the Alternative Equity Market (MAB).
